

Position: **Senior Structural Engineer**

Job Number: SSE441101

Location: Perth

Schedule: Full Time

Salary: Competitive

Description: This company's Mining & Metals Division are seeking a highly experienced Senior Structural Engineer to join their innovative team and work on major projects in WA. Ready to get involved in the delivery of solutions to major projects, design engineering, providing technical expertise, mentoring junior engineers and solving technical issues.

As an integral member of the structural team, you will be influential in all aspects of project delivery and will be driven to achieve innovative solutions whilst providing an exceptional service to our clients.

Your understanding and success in the design of materials handling and mining structures will be complemented by your leadership, communication and client management skills. In addition, you will play a significant role in the development of our talented pool of graduates.

Applications: Email your resume in the strictest confidence to Shirley@exemplar.com.au
